

AnyBuy Team Working Agreement

Logistics:

- Meeting Room: BE340
- Meeting Times:
 - Mon, Wed, Fri: 1:30 pm
 - Tue, Thurs: 5:30 pm
- Project Repository: GitHub: <https://github.com/yibo-gh/AnyBuy>
- Communication: Slack

Development Environment:

- Platforms: windows, mac
- IDE: Android Studio, Eclipse
- Database: MySQLWorkbench

Coding Style/Standards:

- K&R style for braces
- Block indentation: +1 tab
- CamelCase for naming
- 1 Blank line separate sections of code for easier reading
- Comment block explaining how to use back end method

Work Process/Patterns:

- Definition of Done (Task)
 - Code pushed to GitHub
 - Unit test performed and passes
 - New error code/instructions documented
- Definition of Done (User Story)
 - All tasks for user story are done
 - Tests performed and passed for all acceptance criteria
 - Inspected and accepted by Product Owner

Product Design Patterns:

- Simple background and buttons
- Front end connects to back end by passing a LinkedList for commands
- Error codes returned from back end
 - (check document on GitHub for meaning: Documentation/Error Code.txt)
