

Sprint 4 Report

AnyBuy
Team Any Buy
06/04/2018

Actions to stop doing:

In this sprint, everyone did their job well. The only thing we need to stop in the future is when we get the tasks, we should start working on it earlier because some work is much harder than what we expect.

Actions to start doing:

After the Sprint 4, we will start to prepare the presentation and tests. In the preparation, we will explain each one's work to the other team members and let them be familiar with the whole program, including the back-end and front-end.

Actions to keep doing:

Keeping meeting 3-5 time every week and keep communication.

Work completed/not completed:

We completed the selling and offer functions, finish the accpetRate page for customer to choice offers, finish the profile page, upload image using HTTP service and we have the spinners in the buyer pages to choose countries, payment methods and addresses. Also, we give up some functions. They are searching orders in the buy history page and sell history page and changing the preference in the profile page.

Work completion rate:

In the sprint 4, we did 5 User stories and almost finish all the functionality in them and give up some less necessary functions compared with other functions.
