

# Bug Report

Testing personnel: makrone  
Reporting date: June 1, 2018

BRPAMK0001	PaymentAdd	Add Payment
0xFFFF	Crashes	
<p>I went to the payment page to add a new card. Left all the fields empty on the new card page and pressed the add button.</p> <p>If you leave all the fields empty on the payment add page and press the add button the app crashes.</p> <p>The main problem seems to be on line 64.</p> <pre>java.lang.StringIndexOutOfBoundsException: length=0; index=0     at java.lang.String.charAt(Native Method)     at app.anybuy.Activities.PaymentAddActivity\$1.onClick(PaymentAddActivity.java:64)</pre> <p>So the if statement that is having issues is the one that does the checking for the issuer of the credit card. If a check was added to make sure that the field isn't empty it should work fine.</p>
